2. Statement of reasons why variance(s) is/are needed.

Standby generator requires 40 ft setback  
to side property line. The desired  
generator location is 17 ft to the  
side property line. This location  
is desired because it's the safest location  
around the office, away from the parking  
lot and away from the pathway for  
staff and patient access to the building.  
This location does not interfere with any  
nearby properties.
